URINALYSIS

When collecting urine we only need a tablespoon amount. After collecting urine, please keep refrigerated and drop off no later then 24 hours after collecting.

Date: _____ Owner: _____ Patient: _____

Have you noticed blood in the urine? If yes, how long?

Have you noticed an increase/decrease in urination and or drinking?

If decrease in urination is the animal able to urinate?

Any straining or difficulty in urinating?

Has your pet had any urine accidents in the house?

If you brought a urine sample, when did you collect it?

Did you refrigerate it?

What kind of diet is your pet eating?

Are we eating & drinking?

If this is a re-check, how is your pet doing?

What medication is/was your pet taking, the dose & when did you finish or how many doses are left?

Any other medicines (name & dose) we are currently on or just finished taking?

Owner Signature_____ Date:_____

Please have this questionaire filled out completely at the time of dropping off urine sample. We will call you later that day with the results of the urine sample. You may need to return in for medication. For samples being dropped off on Saturday, please try to drop off the sample no later then 10 a.m. since we are only open from 9-11 a.m.

FOR VMC USE ONLY
